

AIR COMBAT USA

An Incredible Dogfighting Adventure

OVERVIEW

At Air Combat USA, you actually fly air-to-air combat. This is not a simulator, instead, you will take the stick of a state-of-the-art military trainer aircraft and engage in aerial dog fighting. No pilot's license is required. Air Combat USA has been in business since 1988, and has flown over 30,000 guest-pilots from across the nation. Our proven track record ensures that your fighter pilot experience will be the most memorable of your life. Your entire flight and each of your victories will be captured on mini-digital video to keep the memory alive for years to come.

THE ADVENTURE

Ground School and Prebriefing

As our guest-pilot, you will be fitted with a flight suit, helmet, and parachute in preparation for your flight. During your ground school, you will cover the tactical maneuvers required to get results during your flight. The integrity of the Air Combat USA multi-phase program is based on highly trained instructor pilots and a field tested course outline. Each mission is tailored to your level of experience, ability and aggressiveness, from armchair to ace. Whether you sign up for Phase I or one of our advanced missions, the course is designed to provide you with a complete fighter pilot experience.

You're At The Controls

Having completed your ground school instruction, you are now ready to roll back the canopy and climb into the cockpit of the SIAI Marchetti aircraft alongside your instructor pilot. The side-by-side seating is unique to this military aircraft and allows you to have more time at the controls of the aircraft than tandem-style front/back seating. You will fly the aircraft up to 90% of the time.

During your Phase I mission, you will try your hand at formation flying and practice the various maneuvers discussed in ground school until you are comfortable with the plane. Then, the real fun begins as you and your instructor work as a team to out-smart, out-maneuver, and out-gun your opponents through six "g-pulling" dogfights. A direct hit will register through our patented electronic tracking system including sound effects, and smoke will trail from the other aircraft. Three cockpit cameras will record the action including a gunsight mounted camera that capture the sights and sounds of every kill.

Postflight Debriefing

When you return to home base after your flight, we will play back the videos taken from each aircraft simultaneously for a chance to relive your kills and view the dogfights from your opponent's perspective. Your instructor pilot will offer suggestions and relate the flight activities to the ground school theory, giving you even greater insight into the art of aerial combat.

POWERFUL, HIGH-PERFORMANCE AIRCRAFT

The SIAI Marchetti SF260 is a current production, Italian-built, fighter-aircraft. It has 260 horsepower, can fly at 270 MPH, FAA certified to +6 to -3 G's, and can perform unlimited aerobatics. It was originally designed to transition student pilots to jet fighters. It is maneuvered by the stick grip complete with gun trigger, identical to the F4 Phantom. The pilot and guest-pilot sit side-by-side with dual controls. The Marchetti is used by dozens of Air Forces worldwide. Air Combat USA owns and operates a fleet of SIAI Marchetti aircraft nationwide.

TRAINING PROGRAMS & PRICES

Basic Air Combat Maneuvers \$1395/Person

Phase I - Experience first-hand the thrill and excitement of flying a light attack fighter in air-to-air combat. Phase I provides an introduction to the Tactical Fighter Maneuvers (TFM-I). Fully briefed you'll climb into the aircraft alongside your instructor. With your hands on the controls you will engage in six "g-pulling" dogfights. Your flight will be recorded on mini DV and reviewed in a flight de-briefing. Groups are welcome. Bring a friend and settle the score.

Fighter Lead In Program \$2095

Our most comprehensive training program, combines the Basic and Intermediate Tactical Fighter Maneuvers in this one day course. Our Fighter Lead In Program is devoted to formation flight, hi & low yo-yos, lead and lag pursuits, displacement rolls, vertical and oblique turns, rolling scissors and high side attacks. You will actually fly two separate missions; the first flight is a practice session focusing on the fundamentals of each maneuver and preparing you for the second flight where you will use the maneuvers in a variety of tactical situations. Build on your basic fighter skills by enlisting in the Fighter Lead In Program. As a graduate you will receive your flight video and be commissioned as a Major in the Air Combat USA Fighter Squadron. This entitles you to special flying privileges. A real fighter pilot fantasy.

GIFT CERTIFICATE & PROMOTIONAL VIDEO

A flight with Air Combat USA makes a truly unique gift. When you purchase a gift certificate from Air Combat USA for a friend or loved one, we offer you more than the standard certificate. Instead we personalize our (VHS or DVD) promotional videotape, which is approximately four minutes long. The video describes the program complete with footage of the briefing and the flight. As the recipient of your gift watches the video, your own personal message (i.e., Happy Birthday, Love Jane) will scroll across the screen. If there is someone in your life that has earned the right to be "TOP GUN", then there is only one choice out there; an Air Combat mission with Air Combat USA. It will "blow-the-socks-off" the birthday guy or gal, your best client, and or your top sales people.
