

Airship Adventures - Slow Motion Fun

FLY THE LEGENDARY ZEPPELIN AIRSHIP

See California in a whole new way. Climb inside one of the world's only flying Zeppelin NT Airships for an incredible slow-flying adventure. Everything looks better from the wide open window of a Zeppelin.

Fly over the Golden Gate Bridge, the Hollywood Sign, the Queen Mary and more. See some of California's most famous landmarks from above. A variety of flight profiles and flight locations are available to both individuals and groups.

The Zeppelin NT "Eureka" is bigger than a Boeing 747 and cruises at a leisurely 35 mph. At that speed, you're traveling just slightly faster than the average seagull. The gentle pace makes it easy to capture great photos of the sights below or simply sit back and enjoy every detail beneath you. Every seat is a window seat in the "Eureka"...and we mean every seat.

The "NT" in Zeppelin NT stands for "new technology". The "Eureka" features a rigid airframe, covered in the same high-tech material used to make NASA spacesuits. The airship is filled with non-flammable helium and has been designed for optimum safety and comfort.

Home for the Airship "Eureka" is historic Moffett Field, near San Francisco. Moffett Field is a former airship base, located deep in the heart of Silicon Valley. The field is home to the prestigious NASA Ames Research Center. Flights also depart from Long Beach and Oakland.
