

COLORADO SKYFIGHTERS

Rocky Mountain Shootout

an Incredible Air Combat Adventure near Denver, Colorado in the T-34.

The Adventure

Learn aerial combat basics from the guys who've done it for real. No prior flying experience is necessary to carry out an air combat mission from the front seat of a T-34 A Mentor. After a detailed briefing on the ground covering air combat tactics and safety procedures, you'll take your position in the cockpit and take off on your mission.

You'll be coached throughout your air battle by one of our seasoned pros. All Sky Fighters pilots are former US military fighter pilots. On average, they've accumulated more than 10,000 flight hours. Each T-34 is equipped with a gunsight, gun firing mechanism and video system to track, "shoot" and record your "kills". A video of your adventure is part of the air combat package.

The T-34

T-34 Mentors were built to serve as a primary trainer for the US Air Force and Navy between 1953 and 1959. The planes are fully aerobatic and have been upgraded to meet or exceed all current FAA standards. They fly like World War II fighter aircraft.

The Location

Your adventure begins at Centennial Airport, located in Englewood, Colorado, just 10 m. southeast of Denver. Flights are available year round. You'll fly over the Colorado plains and enjoy a great view of the Rocky Mountains.

Restrictions

Almost anyone in reasonably good health can fly but a few height and weight restrictions apply. Contact us to be sure you'll fit comfortably into our planes.

Scheduling

Flights are offered year round and typically begin at either 7:30 am or 12:30 pm. Expect to spend approximately four hours at our training location. Your actual air combat mission will last approximately an hour. Sky Fighters missions are very popular, so it's best to reserve your adventure several weeks in advance.

Can I Give This as a Gift?

Most definitely. We'll be happy to send you a gift certificate.

What Does This Cost?

An Air Combat Mission in the T-34 in Colorado is \$849.
